5

April 9, 2026

To: Town Board Members

I respectfully request to present to the Town Board at the April ²¹~~20~~, 2026, Work Session Meeting. There are some new Engine Emission requirements that will be going into effect in 2027 that will impact on the Town Highway Department and the current 10-year equipment plan.

I have attached some equipment quotes that I believe the Town should consider avoiding the costly upgrades that are coming. I also have included information on the status of the current NYSDEC equipment grant funding that we are expecting by the end of the year.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Gunner", written over a horizontal line.

Subject: RE: Status of MWRR grant MWRR-2021-00109 for leaf truck and grapple loader

Hi David,

Many municipalities (especially smaller ones) don't purchase an item until after their contract is executed and they're sure they'll get the grant money. However, you don't get the grant funds until we have proof of purchase/payment and it's been inspected by the regional office.

So, we can go ahead and continue working towards (hopefully!) approval and an executed contract before you receive the truck. Just looking at my spreadsheet I see the description includes "leaf vac and chassis." Is that a separate truck? If so, we can do a partial payment for that portion of the grant once approved (if already purchased), then a second payment for the second vehicle once it's all set, which may help the Town out a bit.

Make sense?

Doug

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Thanks Doug!

That is quicker than I thought it would be. I have a question? My final purchase on the grant is a new Peterson TL3 Grapple truck. I am ordering it next month and will have it 1/1/27. Do I have to have it paid for already and show a cancelled check or will a purchase order be sufficed to receive the grant match? If it must show a cancelled check before 1/1/27 let me know and I can always pay for it out of fund balance.

Dave Gunner

Good morning David,

I got your message. I'm currently up to #1471, so with a few denied applications in the list (we track them all) I'm around 30 apps away from yours. I estimate it'll be another 7-11 months at this point.

Let me know if you have any other questions.

Thanks,

Doug Powell

Dear Mr. Gunner,

Re: Municipal Waste Reduction & Recycling (MWRR) State Assistance Program
Town of Aurora – Residential Yard Waste Vehicles
GG Applic.: DEC01-MWRR-2021-00109
State Share Requested: \$353,925

This letter is in reference to your application for funding under the Municipal Waste Reduction and Recycling (MWRR) State assistance program.

Your project has been assigned **Application No. DEC01-MWRR-2021-00109** and the application has been added to the MWRR wait list at position **#1504**. We have reached MWRR wait list position **#1405** with current State budget appropriations. It may require three to five years after an application is submitted for funding to become available. We ask for your patience during this waiting time.

Per Part 369-2.1(b), costs incurred more than one calendar year before the date the application is received are ineligible for reimbursement under the MWRR program. Therefore, the 500 recycle bins on line 4 of your budget worksheet are ineligible for funding under this grant.

Please be advised that your application is currently incomplete as the Recyclables Tonnage Summary Worksheet did not include figures for Materials Collected for Disposal or Recycling Rates if the project is approved. Your previously submitted form is attached for your convenience. Please submit the updated form as soon as possible to: RecyclingGrants@dec.ny.gov.

Please also be advised that application acceptance is NOT a guarantee of funding. Grant projects can only be funded after the complete application is reviewed and approved by the NYS Department of Environmental Conservation (DEC). Expenditures made in advance of DEC approval are the responsibility of the applicant until the project is reviewed and determined by DEC to be eligible for MWRR funding.
