Subject: Request to Present at Work Session

Good afternoon Town Board,

We specialize in custom Fixed rates for municipalities and energy management for public entities. I understand the Town is now purchasing on a variable Cooperative Rate.

Next Era Energy recently acquired an energy company you worked with in the past, we would like to offer a custom rate to the Town that is only available to former customers of New Wave Energy.

We strongly recommend the Town consider a fixed rate rather than being vulnerable to the variable open market in NY.

We have seen energy budgets blown already in Quarter 1 of this year. This approach provides transparent budget stability and forecasting.

Is there availability to be added to a work session or Town Board meeting to consider a different strategy?

Energy rates, and savings bonus are hypothetical and a projection based on usage and rates. Actual prices, rates and usage are subject to change due to market or events.

Thank you,
Kevin
